

ASCEND ADVENTURE @ ST. COLUMBA

NOTE: Group size and skill level of participants affects how long it takes for your group to complete your selected activities. Not every participant can or will complete activities in a similar amount of time so estimating the total length of your program becomes difficult and inherently imprecise. In some cases we may split your large group into more manageable sizes and run the activities concurrently in rotation in order to guarantee your participants have more chances to try the activities in order to align the activities with your retreat schedule.
